PROFESSIONAL SUMMARY

An experienced technology professional with a background in software engineering and data scientist-mid level. I enjoy building practical solutions, working with data to find insights and solving technical problems that improve systems and processes. I am comfortable working both independently and as part of a team, and I value clear communication, attention to detail, and meeting deadlines. I am always eager to learn new technologies and approaches that help deliver efficient and reliable solutions while contributing to the overall goals of the organization.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, HTML/CSS

Frameworks & Tools: FastAPI, Spring Boot, Streamlit, Git/GitHub, REST APIs

Data & ML: Machine Learning, XGBoost, SHAP, Data Analytics, Statistical Analysis, Data Visualization

Development: Backend Development, Database Management, Software Development, QA Testing, Technical Documentation

CORE SKILLS

Problem Solving | Data Analysis | Machine Learning | REST APIs | Team Collaboration | Communication | Debugging | Critical Thinking | Analytical Thinking | Attention to Detail | Adaptability | Leadership | Reliability | Professionalism | Results-Oriented Approach

EDUCATION

University of Kabianga

Bachelor of Science in Computer Science – Second Class Lower Division

Kericho, Kenya

2021 – 2025

EXPERIENCE

Data Science Intern

May 2024 – August 2024

Kenya National Bureau of Statistics (KNBS)

Nairobi, Kenya

- Assisted in data entry, validation, and analysis to support national census operations across various schools in Kenya
- Digitized and validated survey data with 99% accuracy, improving efficiency of statistical reporting processes
- Contributed to technical report writing and database management, ensuring high quality outputs for research team
- Gained hands-on experience in a structured government environment and supported daily operations and reporting tasks

Machine Operator Assistant

June 2023 – August 2023

Mabati Rolling Mills

Nairobi, Kenya

- Assisted in monitoring and operating industrial machinery while maintaining safety and quality control standards
- Reported equipment faults and supported maintenance teams to reduce operational downtime
- Maintained operational records and production logs to support process tracking and efficiency monitoring

Freelancer

2022 – 2024

Remote

- Provided transcription, data annotation, video/audio editing, QA testing, and academic writing services
- Delivered high-quality outputs while managing multiple client projects and meeting strict deadlines

PROJECTS

Biometric Student/Employee Identification System | *Python, FastAPI, Machine Learning, SQL*

2026

- Developed a biometric authentication system to streamline student and employee identification using fingerprint recognition
- Built a REST API with FastAPI to handle registration, authentication, and database operations efficiently
- Integrated SQL database for secure storage of user credentials and biometric templates
- Designed the system with scalability in mind to support institutional deployment and real-time processing

Mobile Money Fraud Detection System | *Python, Machine Learning, XGBoost, SHAP, Streamlit*

2026

- Built a fraud detection model using machine learning to identify suspicious mobile money transactions

- Trained XGBoost classifier on transaction data and achieved high precision in flagging fraudulent patterns
- Used SHAP for model interpretability to explain predictions and improve transparency for end users
- Deployed an interactive dashboard using Streamlit for real-time fraud monitoring and visualization

Intelligent Banking Risk Assessment System | *Python, FastAPI, Machine Learning, Data Analytics* 2026

- Developed a risk assessment tool to evaluate loan applicants based on historical financial and demographic data
- Implemented machine learning models to predict creditworthiness and reduce default rates
- Built RESTful APIs using FastAPI to integrate the system with banking workflows and external data sources
- Performed exploratory data analysis and feature engineering to improve model accuracy and performance
